

Fieldguide for Financial Audit

The AI Platform for End-to-End Audit Efficiency

Fieldguide for Financial Audit is an AI-powered platform that drives efficiency across the entire audit lifecycle. It combines Fieldguide's innovative AI capabilities, award-winning end-to-end engagement automation, and trusted methodologies – all on a single modern platform for audit and assurance engagements. Fieldguide helps firms alleviate the industry-wide talent crisis for audit and advisory services, enabling them to streamline their engagements, bring greater consistency to their financial audits, and intelligently automate their work. With Fieldguide for Financial Audit, firms can increase engagement margins, drive higher audit quality, and modernize the client experience.

The Fieldguide Difference

End-to-End Efficiency

Fieldguide's comprehensive and modern platform helps manage every aspect of an audit from kickoff to close, so teams can spend more time on valuable work and client interaction versus copying and pasting across different systems. AI-powered trial balance mapping and data extraction, coupled with intuitive one-click reporting can save countless hours and review cycles across the engagement lifecycle. End-to-end analytics provide insights into additional efficiency improvements, better resource management, and additional client billing.

AI-Powered Audits

Fieldguide for Financial Audit uses the latest AI technologies to help audit teams be more productive and thorough. AI-assisted Risk assessment and testing procedure selection can help teams highlight potential issues and ensure the right work is performed, and AI-powered requests can greatly improve team productivity and client interactions. Practitioners can use AI to easily summarize or provide recommendations about audit evidence and client documents.

Higher Quality Audits

Fieldguide embeds trusted methodologies, libraries, templates, and workflows in an intuitive modern experience, so every financial audit meets rigorous standards. Practitioners can use AI-powered suggestions throughout every phase of the audit to ensure that issues are resolved. Robust trial balance and adjustment functionality, as well as real-time collaboration on working papers with executive visibility into tasks and signoffs provide additional quality control to all financial audits.

The future of Trust. Powered by Fieldguide.
